Calcivet Forte

Oral Liquid Calcium Supplement

CAVF

Nutritional Value Per 100 Grm

- Nutritional Supplement of Highly Bio-Available Ca, Ph & Minerals
- With Shatavri & Jeevanti milk enhancing Herbs.
- Improves Milk Yield And Fat Percentage.
- Prevents chances of Rickets, Dystocia, Prolapse, Milk Fever.
- Improves Feed Intake.
- Improves Egg Production and Fertility.
- Prevents Muscular Weakness, Stress Condition.

- Ca 3256mg
- Ph 1677mg
- Vit.D3 1600 IU
- Vit.B12 200mcg
- Cobalt 40mg
- Iron 200mg
- Manganese 70mg
- Aq.Extract Of
- Shatavari 2000mg
- Jeevanti 600mg

- Essent Fatty Acids
- Reuse Of kitley
- Higher Milk Yield
- Homogenous Suspension
- Improves Feed Intake & FCR

Oral Administration

Cows/Bufalos/Horses 100 ml Daily.

Calcives/Sheep/Goats 50 ml Daily.

Poultry 100 ml /100 ml Birds.

Small Animals 10-20 ml Daily

Available Packing : 500ml, 1Ltr, 5 Ltr., 10 Ltr., 20 Ltr., 40 Ltr.

Milk-O-Max Forte

Mineral Mixture Powder in Chelated Form

- Nutritional Supplement of Highly Bio-Available Minerals, Vitamins & Shatavari.
- Covers Mineral Deficiency
- Improves Milk Yield And Fat Percentage.
- Prevents chances of Rickets, Dystocia, Prolapse, Milk Fever, Abortion, Non ROP
- Improves Feed Intake.
- Improves Egg Production and Fertility.
- Prevents Muscular Weakness, Stress Condition.
- Complete Feed Supplement of Mineral Mixture.

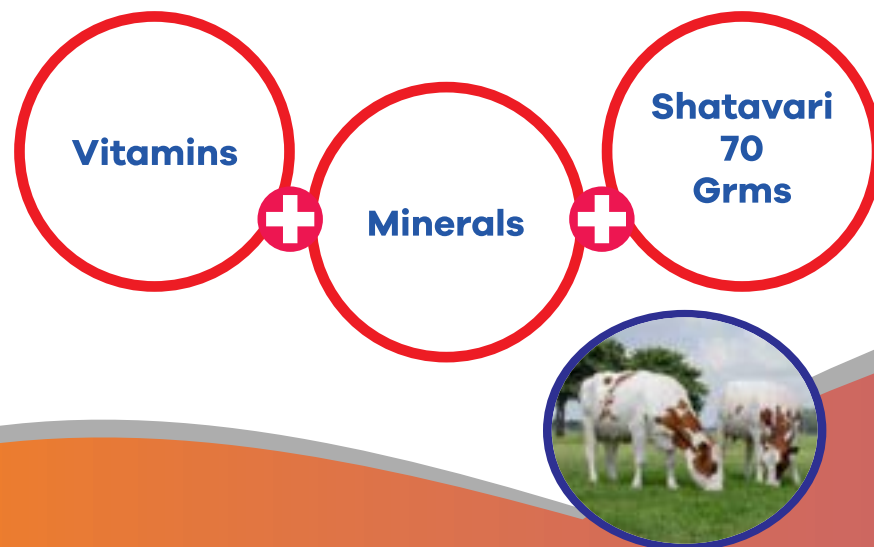

Dosage: Oral Administration | Cows/Bufalos/Horses 50-60 grm Daily.
Calves/Sheep/Goats 20grm Daily. | Small Animal 10-20 grm Daily.
Available Packing: 1kg, 5kg, 25kg

Nutritional Value Per 1 Kg

Ensure Money Return By Higher
Milk Production and Better Health.

Lacten Forte Tab

Lactation Tablet For Lactating Animal.

- Specially for Letting down of Milk
- Improves Milk Yield
- To be used to solve
 - Drop in Milk due to non ROP
 - Milk fever Cases
 - Drop in Milk due to FMD
 - Drop in milk due to Anti Biotic Treatment.

Nutritional Value Each Tab

- Shatavari 300mg
- Jeevanti 10mg
- Ashwagndha 10mg
- Vidarikand 10mg
- Kamboji 10mg
- Base

Dosage :

Oral Administration 10 to 20 Tabs
Twice a day one hour before Milkout

Available:
100 Tab Box.

- For Letting Down of M
- For increasing milk out
- Powerfull Ayurvedic Cc
- Faster Recovery in Dair

Calcivet Gel

Oral Ionic Calcium Gel

Calcivet gel is a pure Ionic Calcium gel for fast and Insetent "CA serum Labal extended acting calcium gel that helps to minimize chances of hypocalcemia.

Why choose Calcivet gel?

It is 100% non-irritating formula for animals. Maintains calcium balance

- Pure Ionic Calcium Gel
- One tube 43.5 Grm of Ionic calcium
- 32 GrmCa. serum level in just 2 Hrs.
- Rest 11.5 GrmCa. sustained release in 4Hrs
- Irritation Free swaloing

Dosage :

Oral Administration single bottle at a time
Repeat after 6 Hrs. | Faster "Ca" Serum level
In Dairy Animal use one bottle after every 15 days.

Calcivet Gel will be usefull in:

- Milk Fever Cases
- Ca. Drop Down Cases
- After Calving & before Calving
- To increase Milk Yield
- Faster Calcium Serum level

Dosage : Oral Administration 10 to 20 Tabs Twice a day
Available : 100 Tab Box.

GroVit-H

Vitamin Liquid feed supplement

Grolact is a powerfullantistress liquid
Liquid feed supplement of Vitamins for
cattle and poultry.

Why choose GroVit-H?

Special Formula helps to improve udder health
for maximum milk production

Composition:

- Vitamin H
- Ele.Selenium
- Vit.A, Vit.E, Vit.B12,
Vit.D3

Features :

- To remove stress
- Improves udder health
- Increase milk production
- Prevents mastitis
- Stops hair loss
- Improves fertility of breeding
cattle's & bulls

Available:

**Bottle of 30ml
60ml and 500ml**

Presentation: 50ml, 100ml, 250ml, 500ml, 1litre

Grolact-Liquid

Vitamin feed supplement

Grolact is a powerful antistress liquid vitamin supplement for cattles and poultry animals.

Why choose Grolact Liquid?

It helps to reduce stress and boost immunity that aids in proper growth.

Composition:

Vit.A
Vit.D3
Vit.E
Vit.B12

Available:

**Bottle of 30ml
60ml and 500ml**

GRCT

Usage:

- To remove stress
- Immuno-stimulant
- Better fertility
- Healthy pregnancy
- Increased milk production
- Keeps udder healthy

Dosage:

**Poultry chicks 5ml/100 birds • Growers 7ml/100 birds
Layers 10ml/100 birds • Large animals-20ml daily
Small animals-5ml daily • Dogs/Cats-2-3ml daily**

Boostovet Bolus

Prebiotics with Yeast & Liver Extract

Each Bolus Provides :

Live Yeast Culture 3 Grm

Amino Acids 2 Grm

Live Lactobacillus Sporagenes Culture 20 millions CFU

Liver Extract 5mg

- Powerful Digestive Bolus.
- Promotes the Activity of Rumen Microflora to regulate Gastro intestinal secretion and the flow of Enzymes to correct digestion And restore appetite.
- To Settle indigestion & to enhance appetite quickly.
- To cure dyspepsia & anorexia.
- To Correct Nutritional disorder.

Dosage : 2 Bolus Twice a Day for 3 to 5 Days.

Packaging : 4 Bolus x 10 Strip

BSTV

Ment-pH

Normalizing gastric pH

A sodium Bi carbonate Bolus for normalizing gastric pH

Why choose Ment-pH?

It ensures the maintenance of normal intestinal functions.

Indications :

- Helps to maintain pH of animal body after any medical treatment.
- Helps to improve Ruminal physiology
- Helps in digestion and assimilation of food
- Constipation
- Gastritis

Dosage :

- Large Animals : 2 to 3 bolus twice a day for 2 to 4 days
- Small Animals : to 1 bolus twice a day for 2 to 4 days

Presentation:

4 bolus X 1 strip 10 strips X 1 box

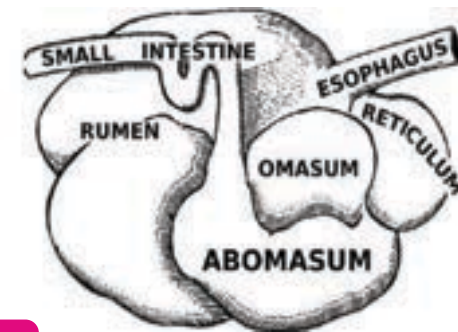

A Unique Combination of fast digestion for Ruminants

Florazyme

Effective Apetite Enhance

Powder

Recommendations:

- Anorexia
- Indigestion
- Bloat
- Persistent Diarrhoea
- Debility
- After vaccination & deworming
- Ruminal Impaction

Composition:

100 gm Sachet Contains:

- Soda Bicarbonate
- Live Yeast Culture
- Amino Acids
- Live Lactobacillus Sporogenes
- Culture 20 million CFU
- Minerals & Vitamins
- Sonth, Ajwain, Rock Salt

BENEFITS:

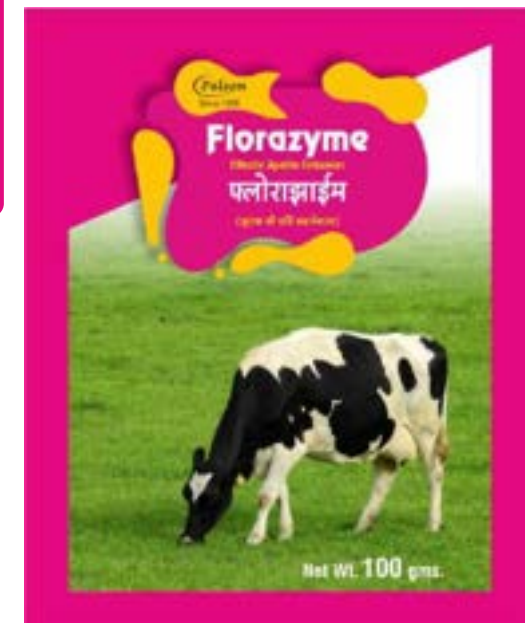

- Florazyme** Improve feed utilization.
- Florazyme** trigger the activity of Ruminal Microflora.
- Florazyme** Increase quantity of Microflora.
- Florazyme** Improve milk production.
- Florazyme** corrects Anorexia.
- Florazyme** Improves digestion.
- Florazyme** Maintains normal Ruminal PH.
- Florazyme** reduces panting.

Dosage:

- Large Animals:** 15-20 gm per day
- In case of Enteritis & Impaction:**
- Large Animals-** 200-300 gm twice a day
- Small Animals-** 50-100 gm twice a day
- or as directed by the Veterinarian

FLZM

Heaton

To generate heat in animals

Heaton is combination of herbs and minerals use to generate heat in animals.

Why choose Heaton?

It is a powerful combination to increases chances of fertilization.

Composition:

- Gajar bees
- Pandharimoharee
- Balantshepa
- Kalonji
- Shivlingi
- Calcium
- Copper
- Cobalt

Dosage:

2 bolus at one time with co-cu strong for minimum 4 days

Features :

- Ovulatory heat is induced
- Maximum chances of Fertilization
- Very effective in repeat breeders

Available in: 2 Bolus Pouch

After-AI

Increasing Conception Ratio & In Time Heat

Covers Mineral Deficiency

Silent Heat

Developed Ovaries and Folicle

Highest Conception in Repeat Breeders.

Zn,Co,Cu in Chelated Form

Nutritional Value Per 200 Grm

Vit.A 10 Lac IU

Vit.D3 1 Lac IU

Vit.E 350 mg

Copper 1600 mg

Cobalt 185 mg

Iodine 325 mg

Zinc 10000 mg

Manganese 3500 mg

Selenium 30 mg

Iron 1500 mg

- Nutritional Supplement of Highly Bio-Available Minerals & Vitamins.
- With fertility enhancing Minerals in Chelated form.
- Improves Conception Ratio.
- Prevents chances of Repeat Breeding.
- Improves Feed Intake.
- Improves Follicle Production and Fertility.

Dosage :

Oral Administration 10 Grm Twice a Day Before And After AI.

Available : 200 Grm, 400 Grm.

Recommended in each and every AI one Pack before & After AI.

Nimpavet

Paracetamol and Nimesulide bolus

Nimpavet to treat fever,
inflammation and pain

Composition:

Each uncoated bolus contains

Paracetamol IP	1500mg
Nimesulide BP	400mg
Excipients	Q.S.

Future :

- Pain
- Inflammation
- Fever

Dosage:

**Large Animals: 2 to 3 bolus
twice a day for 2 to 4 days**

**Small Animals: to 1 bolus
twice a day for 2 to 4 days**

Presentation:

4 bolus X 1 strip 10 strips X 1 box

SERRASON Bolus

The Most Powerful Anti-inflammatory, Antipyretic & Analgesic Combination

Serrason is a combination of Nimesulide, Paracetamol, Serratiopeptidase & Magnesium Trisilicate and is an anti-inflammatory, analgesic, antipyretic & anti-allergic.

Paracetamol: also known as Acetaminophen, chemically named N-Acetyl-p-Aminophenol, is a widely used over-the-counter analgesic (pain reliever) and antipyretic (fever reducer).

Serratiopeptidase: is an enzyme isolated from a non-pathogenic bacteria called enterobacteria

MECHANISM OF ACTION:

Nimesulide: is an inhibitor of cyclooxygenase so it inhibits synthesis of destructive prostaglandins and spares cytoprotective prostaglandins.

Paracetamol: is a valuable central analgesic but weak peripheral anti-inflammatory agent and exhibits antipyretic action.

Serratiopeptidase: helps to reduce pain by blocking the release of pain-inducing molecules from inflamed tissues.

Magnesium Trisilicate: Antacid & gastric sedative. Have Laxative Effect. Relief from symptoms of dyspepsia (indigestion).

Cetirizine Hydrochloride: Treat Urticaria. Dermatitis. Treat Pruritus. Insect - Bite Reaction.

Dosage:

Large Animal : 1-2 bolus per day or as directed by the veterinarian.

Composition :

Each uncoated bolus contains:

Nimesulide B.P.	500 mg
Paracetamol I.P.	1000 mg
Serratiopeptidase I.P.	75 mg
Magnesium Trisilicate I.P.	50 mg
Cetirizine HCL I.P.	25 mg

Indications:

Fever, Acute & Chronic
Inflammation Painful
Condition Lameness,
Sprain Etc.

Presentation: 1 x 4 Bolus

Dysenta

Natural Anti-Diarrhoeal therapy

Dysenta is quick and natural anti-diarrhoeal therapy for young and adult animal.

Why choose Dysenta?

Diarrhoea is very common in animals which adversely affects growth, production and energy. Dysenta has been formulated as quick natural and rational therapy for various types of diarrhoea.

Composition:

Furazolidone IP	500mg
-----------------	-------

Metronidazole IP	300mg
------------------	-------

Excipients	
------------	--

Q.S.

Indications :

- Helps in restoration of digestion
- Antibacterial, antiseptic
- Antispasmodic
- Normalize peristalsis

Dosage :

2-4 bolus twice a day

or as directed by veterinarian.

Presentation:

4 bolus X 1 strip 10 strip X 1 box

Dysenta-L

METRONIDAZOLE, FURAZOLIDONE & LOPERAMIDE HCl

BOLUS: is used in the treatment of diarrhea or enteritis caused by bacteria. Medicine is also used in the treatment of typhoid fever and salmonella infections. The medicine contains Metronidazole Furazolidone & Atropine as active ingredients. Due to its effectiveness and nominal side effects, it is widely demanded in the marketplace.

INDICATIONS:

- Calf Scours, Diarrhoea,
- Enteritis, Dysentry & Dehydration

DOSAGE:

Large Animals: 2 Bolus B.D.
Small Animals: 1 Bolus B.D.

Composition:

Each uncoated bolus contains:

Metronidazole	1000 mg
Furazolidone	500 mg
Loperamide HCL	75 mg

PRESENTATION : 10 x 4 Bolus

Glucopal

Instant & sustained energy

Glucopal provides instant & sustained energy for faster recovery in energy deficient animals.

Why choose Glucopal?

Glucopal is fortified with B-complex vitamins thus providing additional benefits.

Features :

- Optimizes the availability of energy during calving and pregnancy.
- Supports in maintaining normal glucose level in all energy deficient conditions
- Higher lactation yield
- Energy boosting
- In poultry reduces chicks mortality

Composition:

- Glucogenic precursors
- Fortified with B complex and vitamins
- Minerals and taste enhancers.

Usage:

For cattle: 200ml once daily For sheep and goats: 20-30ml daily
Broiler and layer : 10ml/100 chicks 20ml/100 birds Once a week

Presentation: 600 ml drenching bottle.

The Complete Health Formula

Co-Cu Strong

Mineral Tablets

INDICATIONS:

- ☛ Helps to Increase Milk Production
- ☛ Improve the Secretion of Milk
- ☛ Helps to Let Down of Milk
- ☛ Helps to Development for Udder
- ☛ Helps to treating Liver Disorder

SYMPTOMS IN CATTLE LIKE:

- ☛ Leaky teats in cow
- ☛ Fatty liver condition
- ☛ No Milk ley down from one quarter of Udder

DOSAGE:

Large Animals: 1 Tablet BID
Small Animals: 1/2 to 1 Tablet BID
or as directed by the veterinarian

COST

Max-Heal Spray

Antiseptic spray

Max-Heal spray is an Antifungal, Antiseptic, Anti-pruritic, Anti-inflammatory, Fly-repellent spray for animals.

Why choose Max-Heal Spray?

It is an Ayurvedic formula hence highly safe in comparison to synthetic sprays.

Composition:

Neem oil	25.00 V/W
Karanjile	15.00 V/W
Serala	7.00 V/W
Tailapama	5.00 V/W
Devadaru	2.00 V/W
Bhutina	5.00 V/W
Haridra	2.00 V/W
Excipients propellant	100.00
q.s. to coloring agent	

Direction for use:

Clean the affected area spray the required quantity once daily or as directed by the veterinari

Indications :

- Fly repellent
- Maggotedwonds
- Deep seated wounds (FMD wounds)
- Deep penetrated & wide spread wounds

Presentation:
100ml
spray bottle

MXHS

MaxHeal Ointment

Wide spectrum skin ointment

Maxheal is an Antifungal, Antiseptic, anti-inflammatory, Fly-repellent cream for animals.

Why choose Maxheal?

It is an ayurvedic formula and does not cause tissue irritation, allergic reaction or topical toxicity.

Indications :

- Mange, ringworm, eczema,
- dengulla and other fungal infection
Foot-rot in sheep and foot lesions in FMD
- All types of wounds including surgical wounds and burns.

Composition:

Each 50gm Contains:

Cedrusdeodara	25%
AzadirachataIndica	9%
PongamiaGlabra	4%
Ointment base	Q.S.

Direction for use:

Clean the affected part and apply maxheal once or twice a day or as advised by veterinary doctor.

Presentation: 50gm cream

Albez

Broad Spectrum Anthelmintic

Composition:

Each ml contains

- Albendazole IP 25mg
- Excipients q.s.
- Flavoured syrup base

Features :

- Micronized suspension
- Anthelmintic
- Control and treatment of gastrointestinal and pulmonary nematodes, cestodes and trematodes.

Why choose Albez?

Albez oral suspension ensures complete protection from all types and life stages of worms.

Dosage :

5mg micronized albendazole per kg of body weight OR
Large animal : 60 to 90ml Small Animals : 5 to 10ml
Dogs/cats : 3-5ml BD for 3 days

**ALBEZ ORAL SUSPENSION IS A
BROAD SPECTRUM ANTHELMINTIC**

Presentation: 30 ml, 60 ml, 90 ml & 500 ml

ALBZ

Effective Fighter as **Safest Dewormer**

- **Gastrointestinal Nematodes**
- **Lung Worms**
- **Nasal Schistosomes**
- **Amphistomes**
- **Liver Flukes of livestock**

OXYLEV-DS

Oxyclozanide 6% & Levamisole HCL 3% Suspension

Beneficial for milk production

Protonionophore with flukcidal action

REINVENTED PAIR WITH SYNERGISTIC ACTION

Support against fluke infection

Effectively inhibits enzymatic processes in flukes as acid phosphatase and alkaline phosphate widely distributed in tegumental tissue of flukes

Effective against nematodes and trematode and controls the all stages of ostertagia

Dosage :

0.33 ml Oxylev-DS per kg body weight for Cattle , Sheep and Goat

Cattle :

Drench 33 ml for live weight of 100kg and 16.5ml for every additional 50kg body weight upto maximum of 100ml

Sheep and Goats :

5ml Upto 15 kg 10ml upto 30kg 15ml upto 45 kg

20ml (Maximum dose) above 45kg

Best dewormer to eradicate A to Z worms

OXDS

Closen 15

Closantel 15% Oral Solution

Broad spectrum anthelmintic for treatment of Endoparasites & Ectoparasites.

Why choose Closen 15?

Closes the life of blood sucking worms & liver flukes simultaneously.

Composition:

Each ml contains

Closantel 15mg

Excipients Q.S.

Indication:

- Poor growth rate
- For liver fluke eradication
- For ectoparasite eradication
- For eradication of gastro intestinal round worms
- Residual efficacy on wireworm and hookworm

Dosage:

Sheep and goats for endoparasites & ectoparasites 1 ml/15-20kg body weight For immature and adult Liver flukes, Nasal schistosomes 1ml per 10-15kg body weight. Or as directed by veterinarian.

Presentation: 250ml & 500ml

CL15

Cefti-S

Ceftriaxone & sulbactam Injection

Cefti-S is used for treatment of bacterial infections
Why choose Cefti-S?
It is a highly effective injection for bacterial infections.

Composition:

Ceftriaxone sodium	3000mg
I.P.(sterile) Eq. to anhydrous ceftriaxone	
Sulbactamsodium U.S.P.	1500mg
(sterile) Eq. to anhydrous sulbactam	

Direction for use:

Prepare solution by dissolving the content of the vial with sterile water for injection IP. The constituted solution should be used immediately after preparation.

Indications :

- Mastitis
- Pneumonia
- Metritis
- Other soft tissue infection associated with septicaemia

Dosage :

As advised by the veterinarian

Presentation: Dry injection + WFI 3 gm & 4.5 gm

CFTS

BC-LIV

Vitamin B-complex with Liver extract injection.

Why choose BC-LIV ?

Can be used as supportive treatment during antibiotic and anthelmintic treatment.

Composition:

Each ml contains :

Thiamine Hydrochloride IP	10 mg
Riboflavin IP	3 mg
Niacinamide IP	100 mg
Vitamin B12 IP	10 mcg
Liver injection crude	0.66 ml
(Having Vit.B12 activities not less than 2 mcg/ml of Cynocobalmin)	
Phenol (As Preservative) IP	0.5%w/v
Water For Injection IP	q.s.

Indications :

- Live fluke infestation
- Fatty degeneration of liver
- Other Vit.B-complex deficiency conditions
- Supportive during pregnancy, lactation

Presentation:

BC-Liv injection is available in multi dose vials of 100 ml.

BCLV

MeloMax

Anti-inflammatory

MeloMax is an injection indicated for anti-inflammatory purpose and alleviation of pain in animals.

Composition:

Each ml contains

Meloxicam I.P. 5mg

Benzyl alcohol I.P. 2%v/v

(as preservative)

Water for injection

Indications :

- Metritis
- Mastitis
- Pneumonia
- Respiratory inflammations
- Myositis
- Musco skeletal disorders

Dosage:

As directed by veterinarian

MLMX

Well Trusted Safe NSAID

MELOX-Pson Injection

(Meloxicam 5mg + Paracetamol 150mg)

Meloxicam: Anti-inflammatory; Selective COX-2 Inhibitor

Paracetamol: Anti-pyretic, Analgesic

INDICATIONS:

1. Post operative Pain & Inflammation
2. Traumatic injuries
3. Myositis (inflammation of the muscles)
4. Prior to dehorning
5. Supportive therapy in Mastitis
6. Pyrexia of unknown origin

Enroson

Long Acting Antibiotic

Enroson is a long acting antibiotic.

Why choose Enroson?

Assures long term bactericidal effect.

Composition:

Each ml Contains:

Enrofloxacin I.P. 100 mg

Benzyl Alcohol I.P. 1.5 v/v

WFI I.P. q.s.

Indications :

- Various bacterial infections

Dosage :

As directed by veterinarian

Presentation:

30ml, 50ml, 100ml glass vial

STREPTOSON

2.5 GM

Indications:

Infections caused by microorganisms susceptible to penicillin or streptomycin like respiratory, uterine & alimentary tract infections, mastitis, osteomyelitis, peritonitis, septicemia, cystitis, joint-ill and secondary bacterial infections in horses, cattle, pigs, foals, calves, sheep & goats.

Dosage & Administration:

For Intramuscular administration :

Large animals: 2-3 ml/50 kg body weight daily IM for 3-5 days.

Small Ruminants: 1ml/10 kg body weight daily IM for 3-5

days. Small animals: 0.5-1.5 ml/5-10 kg body weight daily IM for 3-5 days.

Mauli Licks

Mineral bricks

High quality mineral salt brick formulated for meat and milk producing livestock including cattle, goats, sheep.

Why choose Mauli licks?

Its unique formula of different minerals help to improve appetite and digestion, increases immunity, stronger bones and faster growth in animals.

Features :

- Improves electrolytes in stressed animals
- Improves fertility fast growth and maturity, and improves overall health.
- Improves milk yield
- Improves salivary secretion to keep the pH stable in digestive system

Direction for use:

Clean the affected part and apply maxheal once or twice a day or as advised by veterinary doctor.

Composition:

- Salt
- Iron
- Copper
- Manganese
- Calcium p
- Phosphorus

restore liver function

LIVOCURE™ Liver Tonic

A unique combination of Liver Boosting and Appetite Stimulant Herbs with Liver Extract, Iron Tonic, Amino Acids & Vitamin B Complex

Benefits

- Improves Liver Health & Functions
- Protects Liver from Various Toxins
- Improves Appetite, FCR & Growth rate
- Prevents Fatty Liver Syndrome
- Helps in Better Feed Intake and Nutrient metabolism,
- Provides Optimum Grwth,FCR, and Protein Synthesis
- Helps in Metabolism, Liver Functions & Provides Energy

Dosage :

- Large Animal 100 ml daily
- Small Animal 20 - 50 ml daily
- Poultry (For 100 Birds)
- Chicks 5-7 ml. for 5-7 days
- Grower / Broilers 10-15 ml. for 5-7 days
- Layers 20-25 ml. for 5-7 days
- Fish 10 ml. per kg. of feed.

MASTILEAV

Cephalexin + Neomycin Sulphate +
Prednisolone Intrammary Infusion for Mastitis

5 gm

An appreciated
formulations to
treat severe
conditions...

Benefits:

Dry Cow Therapy
Clinical Mastitis
Subclinical Mastitis

Cephalexin, Neomycin Sulphate, Prednisolone

- Mastileav is Antimicrobial And Anti-Inflammatory Intrammary Infusion That is Effective Against Gram+ve, Gram-ve Organisms
- Mastileav is Helpful to Reduces The Number Of Bacteria in the Colon
- Mastileav improves The Blood Glucose level Which is Most Desired Proposition in infections
- Mastileav Stabilizes Vascularity Of Epithelial Membranes.

Usage- For Intrammary

For Cattle And Buffalo- One Syringe 5 gm per Affected Quarter After Every 12 Hours or As Directed By Veterinarian

For Sheep And Goat- Half Syringe 2.5 gm per Affected Quarter After Every 12 Hours or As Directed By Veterinarian

Each 5 gm Disposable Prefilled Syringe Contains

Cephalexin IP Equivalent to Cephalexin (Anhydrous)-100 mg
Neomycin Sulphate IP -100 mg+Prednisolone IP-10 mg
